

BHS **Barcelona High School**
International American School Academy

Provide BHS students with invaluable technical instruction in order to better prepare them for entrance into the 21st century workforce.

Treehouse helps software developers reach their true potential.

We've trained 1.1 million developers and designers for companies like ...

We've been voted #1 (twice) as the world's most affordable, effective and scalable school

The Treehouse Platform

We work with businesses, libraries, non-profits, and anybody else with a desire to learn how to code, providing high quality technical training that can be conducted from any laptop browser.

- World-class online learning experience
- Interactive, scalable video-based curriculum
- Built on Competency Based Learning with Learning Objectives mapped to Cognitive Levels, all founded on Bloom's Taxonomy
- Curriculum built in-house with full-time teaching staff
- Passionate and loyal student body
- Platform that can be leveraged to teach almost any subject online in a scalable, effective, measurable way

- Founded in 2010
- 60+ Product Net Promoter Score
- 1.1M+ Students taught
- 345,000 YouTube Subscribers
- 600,000+ Twitter/Instagram/Facebook/LinkedIn followers
- 303 Unique Courses
- 223 Workshops
- 5 Techdegrees
- 1,000+ hours of course and workshop content
- 3,500,000 Courses completed
- 78,400,000 videos watched
- 1,500,000,000 Learning Data Points collected

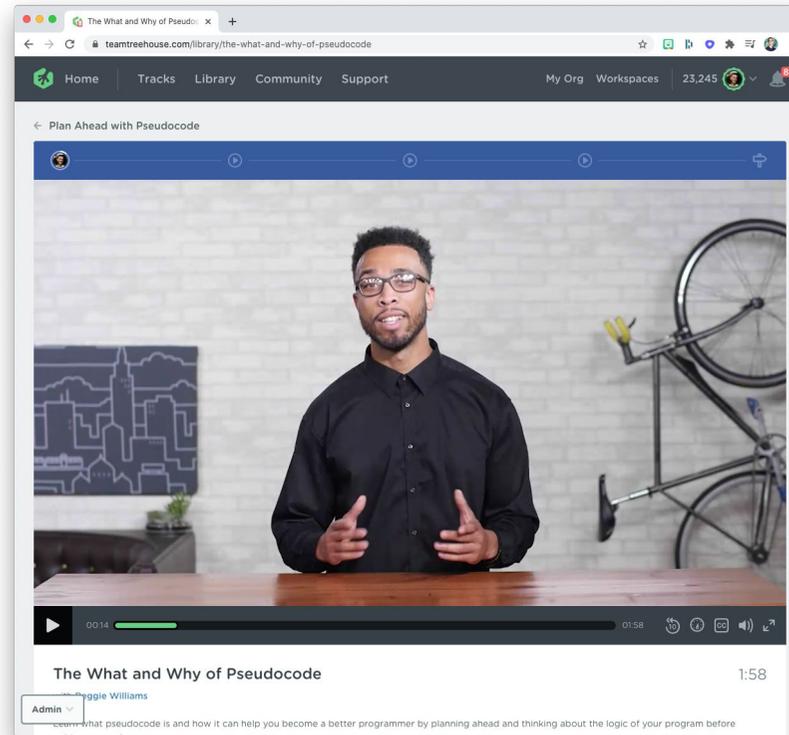

Award-winning Video Instruction

Treehouse provides students with access to video-based instruction of a quality far exceeding industry standards.

We have a singular focus of providing students with straightforward, unintimidating, and practical technology education.

Topics are relevant to the software industry, including JavaScript, Python, Data Analysis, SQL, Security, and

**“Treehouse is our secret weapon in the talent war.
Our competitors have not been successful at
recruiting our Apprentices away from us and
they’ve grown into some of our best talent.”**

– Eric Muntz, VP Engineering

Treehouse Coding Workspaces

The Treehouse platform offers coding workspaces, which are browser-based code editors. Workspaces allow students to complete coding exercises while avoiding the burden of installing and configuring complicated desktop software.

Many workspaces are interactive, meaning students receive real-time feedback on their coding exercises.

We've been voted #1 (twice) as the world's most affordable, effective and scalable online school.

Just like Amazon Prime delivers packages on demand, we deliver high quality, customized coding lessons, on demand.

Treehouse for Teams

Treehouse for Teams provides businesses, libraries, and schools with a convenient solution for managing students, creating and assigning tracks, and monitoring progress.

Organizations can additionally collaborate with the Treehouse team to create custom learning curriculum suited to the specific needs of their students.

Barcelona High School would use the Teams interface for managing students, progress, and curriculum.

Barcelona High School Student Certificates

As a value-added benefit to Barcelona High School, Treehouse will create certificates for students who complete one of two predetermined Treehouse tracks over the course of their subscription.

The Barcelona High School administrator will notify the Treehouse support team upon the student's completion of requisite course work, at which point the Treehouse team would generate and email the certificate.

Certifications can easily be published within the Licenses & Certifications section of students' LinkedIn profiles.
